Yojit Kataria

Pursuing B. Tech in Computer Science Engineering I Aspiring
Software Engineer I

Sonipat, Haryana, India

Summary

I'm a junior B.Tech student with a fervent interest in programming,
specializing in C++ and deeply engaged in Data Structures and
Algorithms (DSA). My journey into coding began with a fascination
for C++'s versatility and extensive applications, culminating in a 2-
star rating on LeetCode for DSA problem-solving in C++.

Alongside my exploration of DSA, I've delved into frontend web
development, where I combine problem-solving skills with creativity
to design intuitive and visually appealing user interfaces. This hands-
on approach includes personal projects and coding exercises,
enriching my skills in both domains.

I'm eager to connect with professionals who share my passion
for technology and mentorship. Whether through internships,
mentorship opportunities, or collaborative projects, I am keen to
expand my expertise and contribute meaningfully to the field of
software development.

Let's connect and explore how we can innovate together in the
dynamic world of technology!

Education

Maharaja Agrasen Institute Of Technology
Bachelor of Technology - BTech, Computer Science · (November
2022 - September 2026)
